

Agile & Scrum for Finance

Agile and Scrum are results-oriented project management methods that have proven to be adaptable for business teams delivering products, or projects, of any type. Agile & Scrum for Finance illustrates how finance teams can benefit from these methods to streamline and expedite finance processes using real-world scenarios. This course is the second of the two-course series on the agile and scrum methodologies of project management.

Learning Objectives:

Upon completion of this course, you should be able to:

1. Describe the characteristics of an agile finance and accounting function.
2. Apply the Scrum Framework to finance and accounting processes or projects.
3. Collaborate with others leading agile and scrum-based initiatives.
4. Deliver greater value through agile and scrum.
