

COURSE DETAILS

Cybersecurity Compliance in the U.S.

This video-based, eLearning (self-study) course provides participants with a deeper look into the many United States regulations regarding cybersecurity. The course will cover a wide array of cybersecurity regulations including those pertaining to medical privacy, financial privacy, educational privacy, telecom, and marketing. Other prominent federal laws, an overview of state laws and state-specific privacy laws will also be discussed. The stakes regarding cybersecurity and compliance controls continue to increase. For management accountants and financial professionals, this course is essential knowledge to enable competent partnering with cross-functional areas of business. After passing the course final assessment, users will earn 1.2 NASBA CPE.

Learning Objectives

1. Identify major federal level sector laws as they pertain to cybersecurity
2. Describe prominent telecommunications and marketing cybersecurity laws
3. Recall state specific cybersecurity laws
