

Cybersecurity Alert!

This introductory course will familiarize financial professionals with definitions relating to common cybersecurity threats and preventative measures taken to thwart those threats. With express permission from authors Joseph E. Brunzman and Daniel W. Hudson, this course leverages material from their informative book, *Open Before Crisis*, to define and describe the complex terms associated with this topic.

Learning Objectives:

Upon completion of this course, you should be able to:

1. Define cybersecurity.
2. Describe the types of cyberattackers, cyberattacks, and forms of malware used.
3. Explain preventative and defensive measures associated with cybersecurity.

Delivery Method: QAS Self-Study

CPE Credit: 0.5 NASBA CPE credit

Field of Study: Information Technology

Knowledge Level: Overview

Prerequisites: Basic understanding of technological advancements and their risks in business.

Advance Preparation: None

Release Date: 6/16/2020
